

Module 6

I made the design choices I did for a multitude of different reasons. I love bright colors complemented/contrasted by black and white. I think the bright colorful design theme throughout each page is fun and exciting. This being said, however, I think it remains professional through the black and white page, font colors, and tool bar. I chose “American Typewriter” and “Candy, Inc.” as fonts because I think they are easy to read, contrasting, fresh, but also professional. The picture I chose of myself is a picture that I have always liked, however, I am thinking about switching it out for one of my senior pictures. Overall, my goal is to express who I am and my design skills through my website.
